

As an estimator at Eastern Mechanical Services Inc., where I have been contributing to construction estimates for the past six months. I am dedicated to providing accurate and efficient cost estimates, ensuring the successful planning and execution of projects.

Before joining Eastern Mechanical Services Inc., I studied at the University of Connecticut. There, I developed a strong foundation in communications, time management, and project management, along with enhancing my ability to work well with others. My education, combined with a keen attention to detail and analytical skills, enables me to deliver precise estimates and support the company's objectives effectively.

In my free time, I enjoy immersing myself in a variety of video games that span multiple genres and decades of release. Additionally, I love traveling across the United States with my friends, exploring new places and creating memorable experiences.
