AA Plus Bonding

Re: EMS, Inc

To whom it may concern,

I am writing this reference letter on behalf of EMS's performance on the Fuel Cell Energy project at 62 Triangle Street in Danbury CT. The project was started in 2016 and completed in 2018 and EMS's contract value was \$1,100,218.26. EMS was a great team partner on this project providing their expertise not only in the field installation but also on the paperwork side of things. They helped with the project scheduling, design build aspect and procurement of materials in a timely fashion. This project was a prototype for Fuel Cell and as such was a very challenging installation as the design was in flux throughout the project. EMS rose to the challenge and I would highly recommend them for even the most complex project. Please feel free to contact me at your convenience with any further questions or information you may need.

Yours Truly
