

I am a seasoned Director of Estimating and Project Engineer at Eastern Mechanical Services, Inc., based in Danbury, Connecticut. With over 12 years of experience here, I have honed my expertise in mechanical and plumbing budgeting, plan and spec estimates, design-build, and value engineering. My roles involve overseeing drafting, managing product sourcing and buyouts, handling PO processing, submittals, and O&Ms, with a specialty in VRF and ductwork design.

My career at Eastern Mechanical Services began in sheet metal fabrication and installation, progressing to project management before assuming my current position. Prior to joining Eastern Mechanical Services, I worked in various roles at Fastenal and Circuit City, where I gained valuable experience in sales, customer relations, and office management.

I hold a Bachelor of Science degree in Business Management with a focus on Small Business/Entrepreneurship from Western Connecticut State University. Additionally, I am licensed in both plumbing (PLM.028650-P2) and sheet metal (SHM.0007365-SM2) trades and am a certified Notary Public.

I am happily married to Christina Casey, a special education teacher in New York State. In my non-working hours, I enjoy playing with my son, Jake, and our two dogs. I find joy in tinkering around the house, attending events with my wife, and occasionally ATVing or snowmobiling in the woods.

Combining my professional expertise with personal dedication, I strive to be an invaluable asset to Eastern Mechanical Services and a devoted family man.
