

Brandon Chuba is a dedicated and results-driven project manager with a strong background in the sheet metal and commercial kitchen mechanical industries. With over a decade of experience leading projects, managing teams, and ensuring workplace safety, he has built a reputation for delivering high-quality results on time and within budget.

A proud graduate of Mount Ida College with a Bachelor of Science in Business Administration, Brandon was more than just a student—he was an athlete and a leader. As captain of the soccer team and vice president of the Student Advisory Committee, he honed his leadership skills both on and off the field. His academic and athletic dedication earned him a spot on the All-Conference Academic Team.

Brandon's professional journey began at Gradar Metals, where he spent 11 years managing sheet metal projects, specializing in kitchen hood installations. His ability to balance client relationships, safety compliance, and technical execution made him a key player in the company's success. In 2021, he transitioned to GEM Mechanical as a project manager, where he continued leading mechanical teams, coordinating with contractors and engineers, and keeping projects on track.

His expertise is backed by a range of industry certifications, including a Sheet Metal Contractor License, Home Improvement Contractor (HIC) License, and OSHA 30-Hour Construction Safety Certification. As an NFPA member and Fire Watch Certified professional, safety remains a top priority in all his projects.

Beyond work, Brandon is passionate about soccer—whether playing, coaching, or watching a match. He enjoys tackling never-ending home improvement projects, exploring the great outdoors (mountains in the winter, beaches in the summer), and traveling to cheer on the New York Giants. Family is at the center of his life; he and his wife Karen stay busy with their two sons, Owen and Jayden, and their ever-loyal dog, Bentley.

Brandon's combination of professional expertise, leadership, and personal drive makes him a valuable asset in any project he takes on. Whether managing a complex mechanical installation or strategizing his next home improvement endeavor, he approaches every challenge with dedication and precision.
