

Since joining Eastern Mechanical Services in June 2024, Dylan DeGeorge has played a crucial role in managing HVAC and plumbing projects from inception to completion. In his role as a Construction Project Manager, he is responsible for ensuring that projects are appropriately staffed, tackling challenges that arise on-site, and keeping clear lines of communication open between the design team and the field. His ability to manage complex projects with precision and adaptability has made him an invaluable asset to the team.

Dylan brings a strong background in construction management, having begun his career as an Assistant Project Manager. Over the years, he has honed his skills by managing a variety of projects from new construction to large-scale renovations to specialized installations within healthcare facilities. With extensive experience in commercial HVAC and plumbing systems, he is adept at overseeing the full project lifecycle, ensuring both quality and efficiency.

He holds an OSHA 30 safety certificate and is an active member of EMS's safety committee, underscoring his commitment to maintaining a safe and productive work environment. Dylan graduated summa cum laude from Southern Connecticut State University with a Bachelor of Arts. His academic background, combined with his professional experience, allows him to approach project management with a strategic mindset, strong communication skills, and an unwavering attention to detail.
